Projects

Personal Journal App – *Next.js, Firebase*

- Built a responsive personal journal web app with user authentication and Fire store integration.
- Styled using Tailwind CSS and deployed on Vercel.

GitHub User Search App – *React, GitHub API*

- Developed a GitHub profile search app using React and API integration.

- Implemented a light/dark mode toggle and user profile details page.

Recipe Viewer App – *Next.js, Typescript*

- Created a recipe listing platform with static site generation and dynamic routing.
- Integrated Clerk for user authentication and designed a clean, accessible UI.

Product List App – *React, Tailwind CSS*

- Created a responsive product listing page with a functional cart system
- Implemented dynamic product rendering from a local JSON file and styled with Tailwind CSS

User Directory App – *React, TypeScript*

- Built a user directory web app that fetches and displays user data from an external API
- Integrated React Router for dynamic user details pages and controlled forms for adding new users

Favorite User Picker App – *React, Context API*

- Developed a simple app to select, save, and display a favorite user using localStorage
- Utilized React hooks and Context API for state management.

Promote Her App – *React Native, Tailwind CSS*

- Designed and developed a mobile app aimed at promoting women-led businesses and initiatives
- Built using React Native and styled with Tailwind CSS for a clean, responsive mobile interface

- Implemented user-friendly navigation and dynamic business listing features.
